SUCCESSFUL SAP PROJECTS

SUCCESSFUL SAP PROJECTS
FOR OUR CUSTOMERS
FOR OUR PARTNERS
FOR OUR TEAM

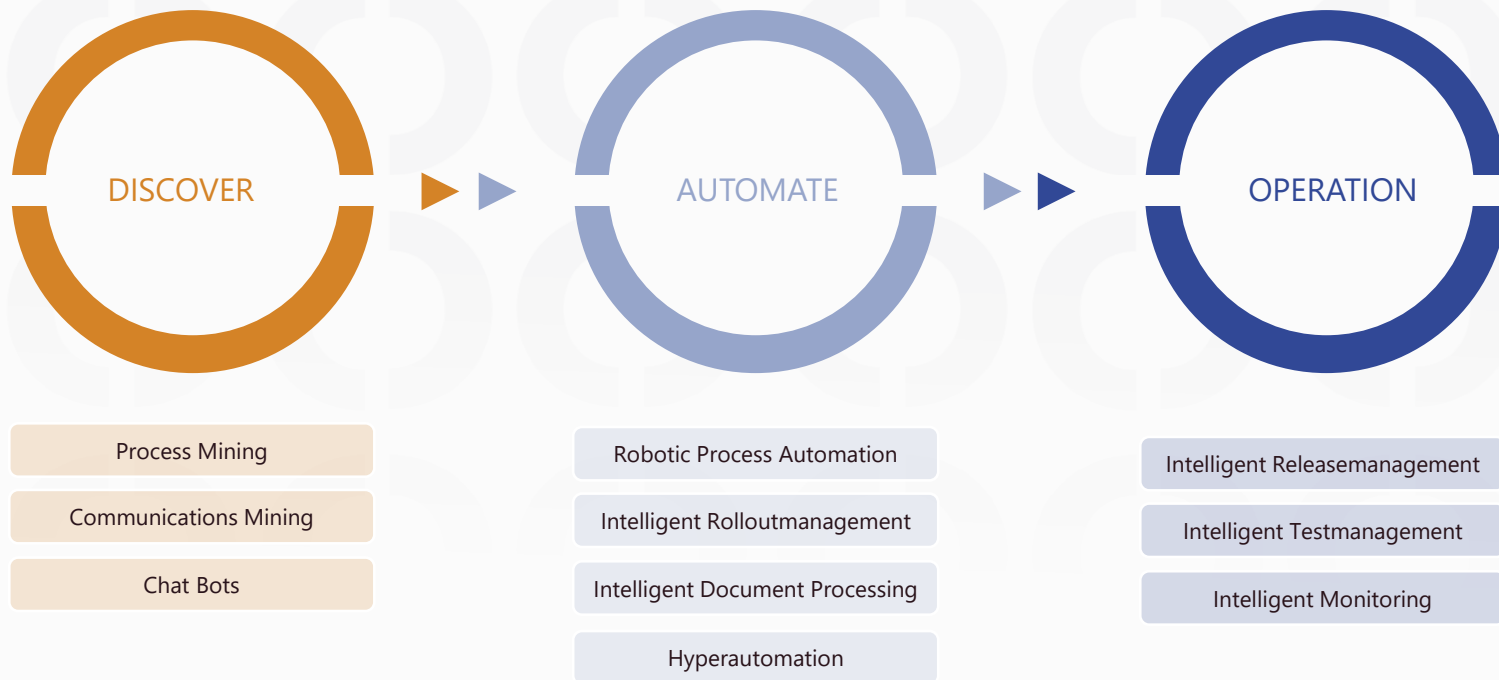

Intelligent Automation

Increase digital maturity and
generate measurable benefits
immediately!

Experience digitalization & automation in practice

Reference Examples: RPA

Migration

- Automated migration of mailboxes & business partners
- Automated loading of sales data into SAP

Operating

- AI-driven automated invoice posting
- Automated distribution of master data to peripheral systems
- Automated creation of partner agreements
- Automated inventories – creation and posting of all inventory data
- Delivery note assignment – open goods receipts (GR) and invoices (IR)

Monitoring

- Automated checking of cost centre groups
- Quality check of established partner agreements
- Technical IDoc monitoring
- Verification of webshop availability

Editing of Master Data

- Creation and modification of article master data
- Creating and changing business partners
- Creating and changing condition records
- Creating and changing factory calendars
- Blocking and unblocking articles

Reference Examples: IDP

Order Confirmation and Delivery Notes

- Order confirmations and delivery notes are attached to the purchase order in SAP
- Goods receipt posting is performed based on the delivery notes
- Verification mechanisms check the order confirmations

Preparation/Verification of Waybills

- Waybills from various shipping companies are checked for errors and discrepancies
- Integration of the waybills into SAP S/4HANA

Hazardous Materials – Safety Data Sheets (SDS)

- Review and maintenance of safety data sheets in the system
- Review and maintenance of product labels

Posting of Invoices

- Invoices are posted automatically. Therefore, the bot performs account determination and posts to different accounts for each business partner

Reference Examples: Test Automation

Release upgrades

- Automated regression tests after release upgrades
- Automated form tests

Software Automation

- Automated installation of POS software
- Automated rollout of POS software

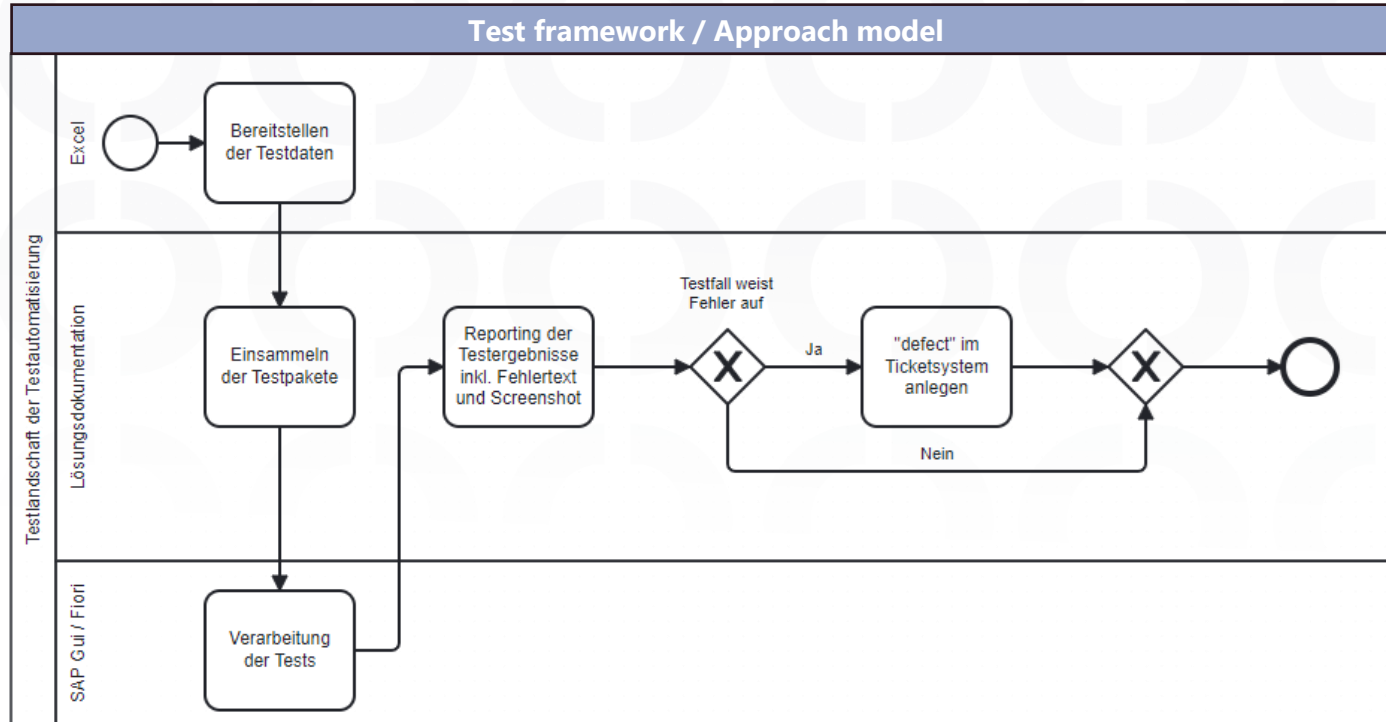

Intelligent Test management

- Automated functional tests for end-to-end (E2E) processes (e.g., Order-to-Cash, Purchase-to-Pay, or Accounting)
- Automated tests after POS upgrades
- Automated interface tests
- Automated mobile device testing

Intelligent Test management

Reference Examples

Initial situation

Release & functional tests in SAP
(in Test and Production systems)

Solution

Fully automated solution

- Automation and parallelization of tests
- Dynamic chaining of processes and locations

Reference AGRAVIS

Costs

- Savings of 6 FTEs

Quality

- Increase in system quality through mass testing and prevention of human errors

Parallelisation

- Execution of up to 800 tests per day through parallel runs

Initial situation

- Manual invoice posting
- Manual opening and extraction of incoming invoices
 - Manual posting of incoming invoices

consenso

Solution

- Fully automated solution
- Automated reading and digitization
 - Automated extraction of invoice content
 - Automated posting of invoices

Reference EDEKA

Costs

- Savings of 15 FTE

Quality

- increase in posting quality

CashFlow

- Faster processing leads to more opportunities for cash discounting

Our mascot "DIGGI"

Advantages

Massive productivity increase & scalability (performance)

- Capacity gain of several FTEs
- Growth in document volume without linear increase in staff
- Department transforms from bottleneck to scalable process

Significantly higher posting quality & error reduction (quality)

- Fewer mispostings = lower audit risks
- Higher process reliability & compliance
- Clean data foundation for reporting & forecasting

Accelerated throughput → measurable cash flow effect

- Direct cash flow lever
- Realization of cash discounts
- Better management of payment terms

Future-proof architecture instead of technical dead-end

- Investment instead of repair
- Avoidance of future re-investments
- Platform strategy instead of isolated solution
