

GROW DIGITALLY. BENEFIT IMMEDIATELY

consenso INTELLIGENT AUTOMATION

► Why automate?

Process automation is not a trend, but the key to a future-proof organisation

Shortage of skilled workers and rising costs are forcing companies to rethink their approach. Recurring and time-consuming tasks tie up resources that are urgently needed for value-adding tasks.

Our solution: bots take over the routine tasks, giving your team the freedom to concentrate on the essentials.

► Why consenso?

AI meets ERP: 25 years of SAP project experience combined with state-of-the-art automation technology

Since 2000, we have been successfully supporting our customers in their SAP transformation. Our service portfolio ranges from process and architecture consulting to the implementation of business-relevant solutions – now usefully supplemented by digital services such as Robotic Process Automation (RPA), Intelligent Document Processing (IDP), Process Mining and Test Automation.

► Process know-how meets technology

We combine in-depth process understanding with practical automation. With our flexible automation toolkit and over 800 bots already in use, we offer comprehensive solutions tailored precisely to your requirements.

► Fast implementation, sustainable benefits

Our automation solutions integrate seamlessly into your SAP system landscape. They are based on the UiPath platform, which is standardised, scalable and also suitable for non-SAP systems.

Your advantages:

- Flexible modular solution – tailored to your processes
- Increased efficiency in operation, rollout and release management
- Sustainable reduction of overtime and weekend work
- Prototype in no time – added value from day one

TRUSTED PARTNER OF

UiPath

AGENTIC AUTOMATION

Consistent usage control reduces costs and streamlines your workload immediately. An intuitive user interface enables quick familiarisation with minimal training.

► Examples of our work in the field of Intelligent Automation

ROBOTIC PROCESS AUTOMATION

- Creation and modification of article master data
- Automated creation of creditors and debtors
- Automated group and IDoc reporting
- Automated roll-out processes

INTELLIGENT DOCUMENT PROCESSING

- Automatic processing of order confirmations
- Automated posting of delivery notes and invoices
- Checking and maintaining safety data sheets

INTELLIGENT TESTING

- Automated regression and functional tests
- Automated cash register and mobile device tests

We would be happy to present these and other exciting use cases to you in person! ► consenso.de/kontakt

► Our offer

We implement consenso INTELLIGENT AUTOMATION in your company – from architecture consulting to prototypical implementation using standardised tools. We work consistently in a user-oriented manner along a roadmap developed jointly for you.

Your advantage: To get you started, we implement a bot for a selected use case – free of charge for up to 10 consulting days.

Get started now and secure your digital edge!
