

Alexander Angerhausen

MANAGING PARTNER

Alexander Angerhausen, born in 1983 in the Münsterland region, is still attached to this region today with his residence in Rheine.

He has been working for consenso Consulting GmbH since 2011. Since 2019, he has been the responsible Managing Partner for consenso's business area Omni-Channel & Store Solutions together with Marcel Ruholl.

Already during his studies at the University of Giessen, during various practice phases, Alexander Angerhausen could gain initial experiences in trade/retail and the SAP environment – specifically with a focus on SD and MM.

Since joining consenso, he has constantly extended these experiences. The starting point was his participation in SAP's "LUNAR" program for the EDEKA group, specifically in the areas Cut-over Management and Process Integration.

Meanwhile, the functional focus of his work is on the integration of processes across all sales channels via GK Software with SAP Retail and S/4 Merchandise, SAP CAR as well as SAP Forecasting & Replenishment (F&R) and C/4HANA – with special emphasis on the topics Project Management, Architecture Consulting and Integration Management. A recent example for his work is the successful go-live of SAP OmniPOS by GK and SAP CAR at manufactum in summer 2018, with Alexander Angerhausen in the role of the responsible Project Manager.
